Plus sur is

Un exemple trouvé sur l'excellent site <https://realpython.com/>

```
>>> a = [1, 2, 3]
```

```
>>> b = a
```

```
>>> a is b
```

```
True
```

```
>>> a == b
```

```
True
```

```
>>> c = list(a)
```

```
>>> a == c
```

```
True
```

```
>>> a is c
```

```
False
```
